Solve the problem. Write your answer as an improper fraction (if possible).

1) $7\frac{1}{6} - 3\frac{4}{6} =$

2) $6\frac{1}{12} - 3\frac{11}{12} =$

3) $8\frac{1}{4} - 6\frac{3}{4} =$

4) $7\frac{1}{2} - 6\frac{1}{2} =$

5) $6\frac{2}{5} - 5\frac{2}{5} =$

6) $8\frac{3}{5} - 2\frac{2}{5} =$

7) $7\frac{1}{10} + 4\frac{5}{10} =$

8) $9\frac{1}{12} + 8\frac{4}{12} =$

9) $8\frac{1}{5} + 5\frac{4}{5} =$

10) $8\frac{3}{10} + 7\frac{4}{10} =$

11) $8\frac{3}{4} + 4\frac{3}{4} =$

12) $7\frac{1}{3} + 3\frac{1}{3} =$

Answers

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
11. _____
12. _____

1-10	92	83	75	67	58	50	42	33	25	17
11-12	8	0								

Solve the problem. Write your answer as an improper fraction (if possible).

1) $7\frac{1}{6} - 3\frac{4}{6} = 3\frac{3}{6}$

$\frac{43}{6} - \frac{22}{6} = \frac{21}{6}$

2) $6\frac{1}{12} - 3\frac{11}{12} = 2\frac{2}{12}$

$\frac{73}{12} - \frac{47}{12} = \frac{26}{12}$

3) $8\frac{1}{4} - 6\frac{3}{4} = 1\frac{2}{4}$

$\frac{33}{4} - \frac{27}{4} = \frac{6}{4}$

4) $7\frac{1}{2} - 6\frac{1}{2} = 1\frac{0}{2}$

$\frac{15}{2} - \frac{13}{2} = \frac{2}{2}$

5) $6\frac{2}{5} - 5\frac{2}{5} = 1\frac{0}{5}$

$\frac{32}{5} - \frac{27}{5} = \frac{5}{5}$

6) $8\frac{3}{5} - 2\frac{2}{5} = 6\frac{1}{5}$

$\frac{43}{5} - \frac{12}{5} = \frac{31}{5}$

7) $7\frac{1}{10} + 4\frac{5}{10} = 11\frac{6}{10}$

$\frac{71}{10} + \frac{45}{10} = \frac{116}{10}$

8) $9\frac{1}{12} + 8\frac{4}{12} = 17\frac{5}{12}$

$\frac{109}{12} + \frac{100}{12} = \frac{209}{12}$

9) $8\frac{1}{5} + 5\frac{4}{5} = 14\frac{0}{5}$

$\frac{41}{5} + \frac{29}{5} = \frac{70}{5}$

10) $8\frac{3}{10} + 7\frac{4}{10} = 15\frac{7}{10}$

$\frac{83}{10} + \frac{74}{10} = \frac{157}{10}$

11) $8\frac{3}{4} + 4\frac{3}{4} = 13\frac{2}{4}$

$\frac{35}{4} + \frac{19}{4} = \frac{54}{4}$

12) $7\frac{1}{3} + 3\frac{1}{3} = 10\frac{2}{3}$

$\frac{22}{3} + \frac{10}{3} = \frac{32}{3}$

Answers

1. $\frac{21}{6}$
2. $\frac{26}{12}$
3. $\frac{6}{4}$
4. $\frac{2}{2}$
5. $\frac{5}{5}$
6. $\frac{31}{5}$
7. $\frac{116}{10}$
8. $\frac{209}{12}$
9. $\frac{70}{5}$
10. $\frac{157}{10}$
11. $\frac{54}{4}$
12. $\frac{32}{3}$
